

JVA 4-Line LCD Keypad

PTE0240

Overview:

The JVA 4-Line LCD Keypad is an integral component in the JVA security electric fence product range. Providing a centralised interface between the customer and their perimeter security solution; it displays the current condition of each security device connected and can draw attention to adverse fence conditions. The keypad is used to control individual fence energizers, monitors or the entire site. The customer has access to all of these features via a menu driven system or by entering key sequences. Security installers also use the keypad to configure the JVA security devices to the customer's needs.

Features:

- Control, monitor and program any Z-series device
- Displays armed / disarmed status and any trouble or alarm
- Device screen displays fence voltages and conditions
- Visual and audible indication of alarm and trouble events
- Menu driven interface
- 4-line backlit LCD display
- Quick arm / disarm keys
- 500 entry event log with accurate date and time information
