

JVA Solar USB PSU

PTE0347

Overview:

The JVA Solar Regulator and USB Power Supply is an advanced component in the JVA Agricultural Electric Fence product range. Providing a Wi-Fi hotspot from cellular 3G and 4G coverage, giving the Customer a link to their internet connected devices in the field. The inbuilt USB Power supply and battery charger make it a multi-featured device, capable of charging a connected 12V battery while efficiently powering the cellular hotspot from the available sunlight. Friendly for the environment and maintenance free, this product is simple to set up and provides a hassle free pathway for your IoT devices, such as IP Cameras, IP Energizers and IP Monitors. This product is a part of JVA's new SWAP (Solar Wi-Fi Access Point) series of devices, providing an elegant solution to a popular issue in remote monitoring situations.

Features:

- Solar regulator up to 150W
- Wi-Fi Anywhere™ ¹
- Connects to any standard 12V battery
- Smart LED battery status lights
- Compatible with any 3G/4G network ²
- Weatherproof sealed plastic enclosure
